EDWARD H. SCHWARTZ

August 18, 1926

Superintendent Bureau of Records
Newark Police Department

TESTIFIED (Page 639 et seq.):

Worked on case with Detective Mason of Newark Prosecutor's office and visited scene of murders (639).

Saw the cedar saplings and foot prints which he imagined were those of a mule, though they might have been of a colt (640).

Foot prints were shod (640).

Also saw where mule had eaten foliage and some manure. No marks fresh (640).

Would think marks were more than a month old. Called into case in October (640).

Worked on case one day under Mott (641).

Had no cards given him (641).

Mr. Daley, official Newark Police Photographer, took photographs, but Schwartz does not know what became of them (641).

CROSS EXAMINATION:

Made investigation in October after Mott came into case (642).

No signs of any great amount of people having been in vicinity of the cedar trees (644).

No great disturbance of the conditions (645).

105.2265 p2

REDIRECT:

Found a stump directly back of the cedar saplings (645).
